15 April 1982

NOTE FOR: Executive Officer, DDA
Special Assistant, DDO

This note requests some assistance from the appropriate elements of your Directorates as you see fit based on the following material.

The DDCI was asked [redacted] for an appointment. After some shifting of dates and research by your good officers, that appointment was cancelled. This was done because of what I found in this Agency about [redacted] characteristics, particularly his apparent penchant for misusing information. Some of the information came from the CI Staff and some of it came from [redacted] who is the COTR of the contract between this Agency and [redacted]. The one important piece of information which I heard about at large which was not documented then, dealt with [redacted]. That piece of information has now been documented [redacted] and a copy is attached.

I have no way to tell whether the information in this informal note is true or false. The significance of this information, however, is clear and needs consideration by Security and by the appropriate people in the DO.

If there is anything I can do to assist you, please let me know. I would appreciate some feedback in due course as to how this whole issue flops out.
